ThincGlobalSoft
Powered By Quality **And Innovation**

SAP execution for a global audio giant for reduced costs and improved decision making

World's leading audio brand wants to implement SAP ERP 6.0

The client faced challenges in the form of keeping track of constantly changing requirements and ensuring that all requirements were met during the SAP implementation.

ThincGlobalSoft deployed a team with experience in SAP implementation who mapped all the business requirements of the client.

TGS' brought in better decision-making which was a result of an increased test result transparency

To know more about how TGS can implement SAP to enable enterprise services in your organization, contact us today

Client

A renowned manufacturer of high-quality audio products and infotainment systems wanted to implement SAP ECC 6 for its company codes under one of its divisions. SAP ERP 6.0 offers over 300 functional enhancements which can enhance process efficiency. By introducing SAP, the client wanted to employ enterprise services immediately in order to improve business competence.

Challenges

The client faced myriad challenges such as :

a) Ensuring that 100% of business requirements were met
b) Country specific localization didn't affect other company codes in the division
c) Country specific localization needed compatibility with global standards
d) Stringent time line
e) No standard process followed in QA
f) Keeping track of constantly changing requirements

Our Approach

We used a team with SAP implementation experience during the course of the project for testing. The TGS team worked closely with the development team to ensure that the project was on the right track. All the requirements of the business were mapped to the Test scripts and even trivial requirements of the business were taken care of. TGS logged in more than 500 defects, ensuring that SAP system functions went live.

Benefits

The client had the following benefits after TGS' intervention:
1. Reduced cost through the application of tools and guide lines for future upgrades and maintenance
2. Reduction in time due to test process standardization
3. Based on SAP and testing experience gave practical advice on Test Strategy
4. Increased end-user confidence in SAP implementation
5. Better decision-making based on increased test result transparency
6. Reusable organizational process assets were delivered
